

ECOPEI Recommends

ECOPEI Islanders recommend some of their favourite websites, movies, books, and magazines.

- **Island Energy** www.islandenergy.ning.com, Created by Rob Paterson, is Prince Edward Island's own online social network. On this community site, members can have their own blog, join and create forums, and add video and pictures. Rob hopes that by working together we can use this site to share views, ideas and stories about how we can reduce our energy consumption and start to create our own local resources.

- **Momentum Magazine** www.momentumplanet.com reflects the lives of people who ride bikes, providing urban cyclists with the inspiration, information, and resources to fully enjoy their riding experience and connect with local and global cycling communities.

- **Briarpatch Magazine's** Jan/Feb/09 issue, Vol. 38 #1 is "The food issue: Eat, Play, Live: The new food revolution" and includes great descriptions of projects, activism, campaigns and books promoting sustainable food systems. To subscribe or order a copy, go to briarpatchmagazine.com.

- **The Dominion** www.dominionpaper.ca issue #55 Nov/08 is a special report on Canadian Mining Companies, especially their dubious record overseas. Issue #56 includes "The Steep Price of Power—Columbian coal fuels Atlantic Canada, but at what cost?". Every issue includes an extensive progressive world-wide review of the month's events, and many good articles and analysis about activists and justice for indigenous peoples, peace and nature.
